Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 2 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Response to Amendment

1. Receipt is acknowledged of the Amendment filed February 12, 2002.

Priority

2. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

3. This application is in condition for allowance except for the following formal matters:

Specification

4. This application does not contain an abstract of the disclosure as required by 37 CFR 1.72(b). An abstract on a separate sheet is required.

Claim Objections

5. Claims 15 and 16 are objected to because of the following informalities: the phrase, "of the or" in lines 2 and 3 are indefinite. The claims appear to include superfluous words, which may be deleted to cure the ambiguity. Appropriate correction is required.

6. Claim 17 is objected to because of the following informalities: the limitations, "the elements" and "the element", in lines 3-8 would more precisely claim the invention and avoid lacking antecedent basis issue by substituting them with -- the magnetic elements --. Appropriate correction is required.

7. Claim 24 is objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. The examiner respectfully suggests reciting the appropriate

Art Unit: 2876

limitations of claim 1 or amending the claim to start with a similar preamble of other dependent claims.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

Additional Remarks

8. It has been noted by the Examiner that WO 99 35610 reference was cited as "X" reference in the PCT/GB00/03092 dated 25 July 2000. Both applications were filed by at least one common inventor. The claims and specification of the WO 99 35610 reference has been considered but appears to be inappropriate as a reference for an art rejection under 35 U.S.C. § 102 or 103.

Allowable Subject Matter

9. Claims 1-28 are allowable.

10. As allowable subject matter has been indicated, applicant's reply must either comply with all formal requirements or specifically traverse each requirement not complied with. See 37 CFR 1.111(b) and MPEP § 707.07(a).

The following is a statement of reasons for the indication of allowable subject matter: none of the prior art of record discloses, teaches or fairly suggests the claimed method of reading a magnetic tag having at least one magnetic element, comprising, among other steps of, determining transition data associated with changes in the magnetization state of at least one magnetic element and determining the element direction which corresponds to the transition data

Art Unit: 2876

for that element. One of the cited prior arts, Yamashita discloses an identification method using a magnetic tag, but lacks teachings of determining steps as claimed in the present application. Accordingly, one of ordinary skill in the art would not have been motivated to modify teachings of prior art to meet the claimed limitations as set forth in the present claimed invention.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Steven S. Paik whose telephone number is 703-308-6190. The examiner can normally be reached on Mon - Fri (5:30am-2:00pm).

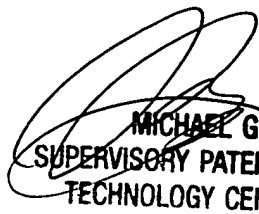

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael G. Lee can be reached on 703-305-3503.
